Silk – Highly susceptible
Fusarium wilt

Silk

Prata Anã

Disease incidence (%)

Disease index (%)

Productivity (ton/ha)

Disease Index (%)
‘Prata Anã’ – Susceptible
What factors are making the difference?

- Organic matter?
- *Trichoderma harzianum*?
- N- Sources?
- Cover crop?
- All of them? What the weight?

The impact of genetic resistance on BRS Princesa.

It means that we should only rely on that?
‘BRS Princesa’
A Silk-type cultivar

- Resistant to FW
- Resistant to BLSD
- Drought tolerant
- Cold tolerant
